PROJECTS

- **Medical Appointment Scheduling System:**

Role: Frontend Developer

Tech Stack: React, HTML, CSS, JavaScript

Project Overview:

HealthCare Plus is a user-friendly web application designed to streamline the process of booking medical appointments. It allows patients to easily view available doctors, book appointments, and access a variety of medical services online. The system features a responsive interface and provides a seamless experience for users across different devices.

- **Coffee Shop Website**

Role: Frontend Developer

Tech Stack: HTML, CSS, JavaScript

Project Overview:

Developed a visually engaging website for a coffee shop to enhance its online presence and promote products. The website features a sleek and modern design that appeals to coffee enthusiasts, encouraging users to explore various Flavors, origins, and brewing methods of coffee. The responsive interface ensures a smooth experience for users on all devices.
